OBJECTIVE

Motivated and detail-oriented MSc Computer Science student with a strong foundation in programming, database management, and software development. Passionate about building efficient and scalable IT solutions. Seeking an entry-level role in software development or IT solutions, where I can apply my skills in Java, Python, and database management to contribute to innovative projects. Eager to leverage my academic knowledge and project experience to solve real-world challenges and grow professionally in a dynamic environment.

PROJECT WORK

Developed an application to provide details of authorized service centers for brands like Apple, Samsung, Asus, HP, and Dell, along with available services.Implemented a troubleshooting module where users input complaint details and receive guided basic troubleshooting methods.Integrated location services to display nearest service centers with route mapping if advanced repair is required. Enabled online service booking and real-time status tracking through both web and SMS notifications..
